## A NEW ERA OPENS FOR MYCOTHERAPY with THERASCIENCE Laboratory

“ ***Mycotherapy is not a passing trend.***

*It is a discipline recognised for thousands of years, supported by numerous scientific studies and with clinically validated efficacy.*

*With **Mushroomsentiel®**, the first integrative mycotherapy range, we are taking a decisive step forward thanks to a unique approach that makes it possible to address numerous pathologies in their entirety.*

*We are setting an unprecedented level of standards, based on reliable products that are perfectly traceable and fully aligned with the expectations of modern functional medicine.*

***Thanks to an exclusive formulation combining the finest mushrooms with microencapsulated probiotics, we offer unique solutions that meet the needs of populations.***

”

**Dr Jean-Pierre AGARRA**

CEO & Founder of THERASCIENCE Laboratory

The best of ancestral Asian know-how,  
enhanced by European scientific expertise and  
pharmaceutical rigour.

## A MAJOR INNOVATION

# The unique alliance of medicinal mushrooms and microencapsulated probiotics

The Mushroomssentiel® range offers a completely new approach by integrating mushrooms and probiotics within a single formula.

This symbiotic association allows optimised absorption and an amplification of the benefits delivered by the mushrooms.

THERASCIENCE Laboratory stands out as a **truly differentiating player** on the mycotherapy market by offering the **exclusive combination of three complementary active principles**:

- **The mushroom totum**: all of its natural components, ensuring a complete and synergistic action.
- **A highly concentrated mushroom extract**: up to 50 times richer than raw powder, for enhanced efficacy.
- **A microencapsulated probiotic core**: to improve intestinal balance.

The effectiveness of **medicinal mushrooms** is **only fully guaranteed** when they are cultivated in **preserved Asian terroirs**, in strict compliance with **traditional standards that cannot be reproduced in European cultivation**.

This is the only way to ensure their **purity**, their **concentration** and the **quality of their active compounds**. This is why the Mushroomssentiel® range delivers such **consistent results**.

**Alexandre CAJELOT**

Engineer & Head of the Mushroomssentiel® range

## CULTIVATION IN ASIA

### FOR GUARANTEED OPTIMAL EFFICACY

Rigorous selection of mushrooms cultivated in the preserved regions of Fujian, Zhejiang and Jiangxi, renowned for their richness in active compounds.

Their biochemical profile, with exceptional potency, is due to these unique environments: humid subtropical climate, rich soils and low industrialisation.

#### A unique organic quality

- artisanal cultivation
- heat-sterilised organic substrate
- total absence of pesticides
- natural maturation
- harvesting at full maturity

- gentle drying
- manual inspection
- powder processing
- controlled aqueous extraction in order to preserve polysaccharides, beta-glucans and triterpenes

## PHARMACEUTICAL CONTROLS CARRIED OUT IN EUROPE

Extraction, standardisation and quality processes involving more than **250 analyses** per batch (heavy metals, radioactivity, chemical contaminants, microbiological parameters and SEC chromatography), guaranteeing impeccable purity and total traceability.

**A SIGNATURE OF EXCELLENCE:** controlled origin, respect for the biological cycle, pharmaceutical rigour

“The laboratory has transformed **exceptional raw materials into active formulas** that are perfectly standardised and targeted. Due to their molecular complexity, mushrooms respond to numerous **physiological needs** specific to each patient's profile: allergies, immunity, cognition, stress management, intestinal health, cellular and metabolic balance, and sports performance, with a measurable **level of efficacy**.”

**Dr Sarah MERRAN**

Micronutrition Physician, creator of the Mushroomssentiel® range

LABORATOIRE  
**THERASCIENCE**  
FOR A BETTER LIFE

# A COMPLETE RANGE OF 12 REFERENCES

## 8 single-mushrooms formulas

- Agaricus
- Chaga
- Hericium
- Reishi
- CordycepsPrime™
- Shiitake AHCC®
- ProAntro®
- Polypore

## 4 expert formulas

- **BIO-BRAIN** cognition and mental clarity
- **BIO-DIGEST** microbiome and digestive comfort
- **BIO-IMMU** immune defences
- **CELL-DEFENSE** cellular protection and balance

## About THERASCIENCE Laboratory

Founded by Dr Jean-Pierre AGARRA, THERASCIENCE Laboratory has become, in nearly 30 years, one of Europe's leading players in preventive and functional medicine. Its mission is to offer science-based supplements to as many people as possible, in order to support major physiological, metabolic, nutritional and emotional balances.

Historically based in Monaco, where its headquarters and in-house R&D department are located, THERASCIENCE benefits from a strong foundation that now supports its international reach. This expansion relies on an active network of subsidiaries and distributors, enabling the laboratory to deploy its expertise across numerous countries. This dynamic development is built on a unique alliance between scientific excellence, naturality and innovation, as well as a longstanding commitment to continuing medical education, which sustainably supports healthcare professionals.

With more than 700 references in micronutrition, phytotherapy, mycotherapy, dietetics and sports health, THERASCIENCE Laboratory designs innovative and highly bioavailable formulas, continuously optimised according to the latest scientific advances. A laboratory of high standards, it relies on the combined expertise of its expert panel and its scientific and medical committees to guarantee rigour and impeccable quality at every stage of development.

With growth equivalent to +15% in 2025, the laboratory employs more than 200 people and generates €57 million in revenue. Guided by its promise "For a Better Life", THERASCIENCE Laboratory's mission is to help science shine with humanity, exacting standards and purpose.
